Assets Used

This project uses no embedded image assets. The website uses a text-based avatar placeholder (initials 'KS') rendered with CSS. Font resources are loaded from Google Fonts (Inter and Space Grotesk) via CSS @import.

External resources referenced in index.html (metadata only, not embedded):

- Open Graph image: https://bolt.new/static/og_default.png
Used in: index.html <meta> tags for social sharing previews
- Favicon: /vite.svg (Vite default, not a custom asset)

No other image, video, or binary assets are used in this project.
